

Doors of new opportunities...

We produce doors available in our standard offer as well as unique ones designed by our clients and professionals. We offer external woodwork of diverse construction and the door wings can be **68 mm to 105 mm** thick with the U-value **U=1,3; 1,0; 0,85; 0,54**. Due to specific character of our work and individuality, our woodwork is produced upon request.

The woodwork products are divided into various production lines of traditional and modern patterns. Our latest achievement is the external energy-efficient door **78 mm** wide with **U-value = 0,85** and **105 mm** wide with **U-value 0,54**. All our products are certified and carry the CE mark.

We manufacture also **46 mm** thick internal doors as well as **55 mm** thick entrance doors.

The door production is based on wooden mixture glued in multi-layers as well as plywood and veneer of pine, ash, and oak wood in var-

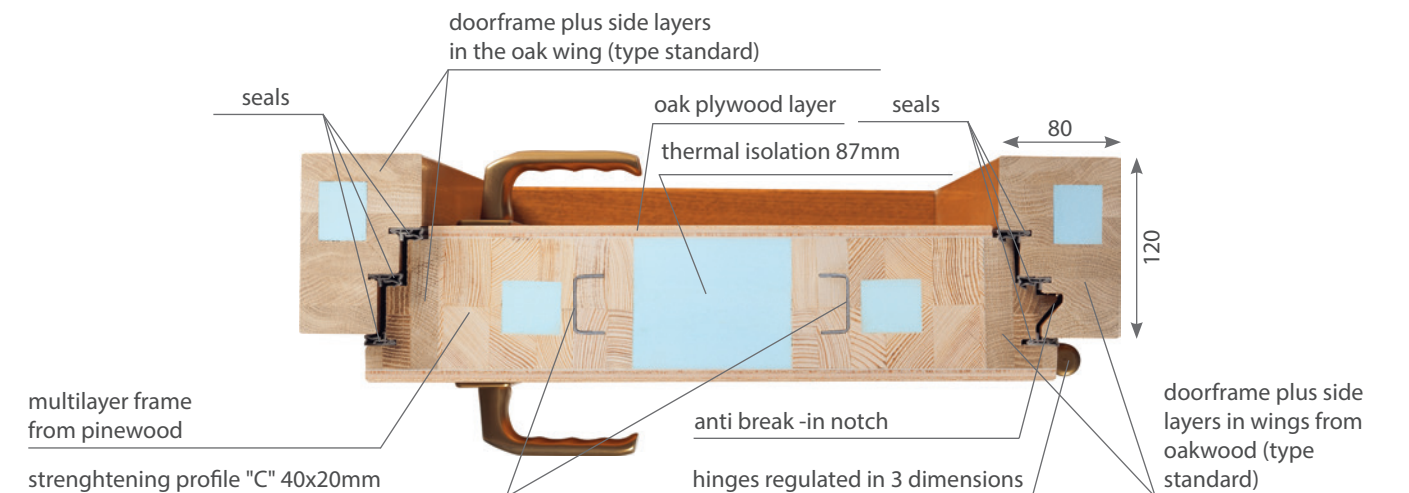

ious wood paints: natural, transparent or covered with so called RAL range of colours with glass, Inox, laminate finishes from quartz sinters. We run our production lines for laminated doors with high quality PVC film. Our wide range of accessories enables us to tailor the final effect precisely to the needs of our clients. Adjustable wooden and steel frames allow our products to be used for many purposes, therefore proving its versatility. Our offer is enriched with entrance doors with strengthened construction and anti-theft locks along with fire-resistant door of **EI30** and **EI60** resistance standards to satisfy special needs.

The internal doors are painted with so called **IRURENA**. The external doors are painted with so called **TEKNOS**.

Since we regularly meet individual requirements and needs of our clients, we believe in our company slogan, namely: **the doors of new possibilities ...**

THERMO WOOD PLUS **0,54 W/(m²K)** thickness 105 mm
