

# ➤ PET Preforms

Steel wire containers

LEAFLET

# STORE AND TRANSPORT YOUR PREFORMS SAFELY

France fil has designed and manufactured high-quality storage and handling solutions for 60 years.

We offer a wide range of standard containers. Their characteristics are optimised for the goods they store and the context of use. For instance, some containers are foldable, stackable up to 6 levels or can be turned over.

Our containers can **store and transport** your preforms in a complete safety. For instance, our containers are used for the delivery of PET preforms in the beverage industry. The container for preforms allows to pour safely its content directly in the hopper of a PET bottle blower.

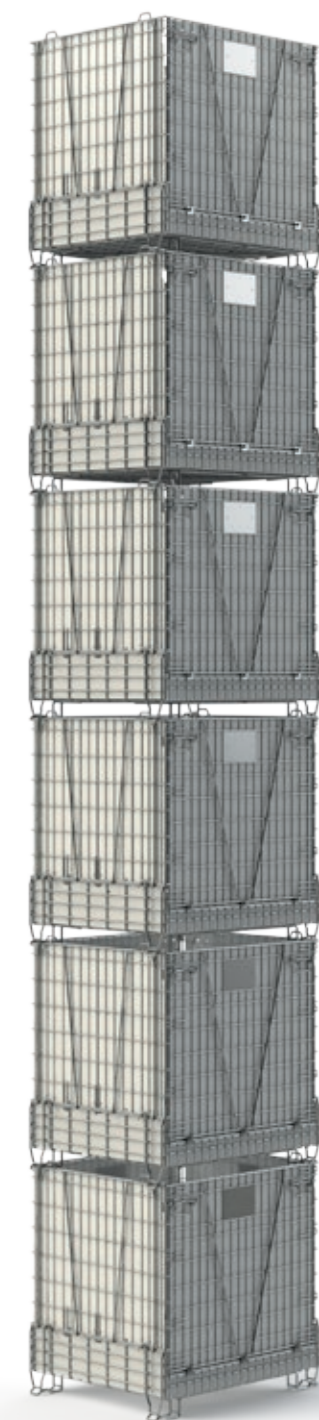

- ▶ Plain or extruded dressing
- ▶ Translucent or colored dressing
- ▶ Special design available on demand

## CHARACTERISTICS

All materials used (steel, coating, Polypropylene) are **Food contact approved**.  
The containers are designed to **resist to the use of a vibrating table** (loading capacity optimisation), especially the locks and the nuts.  
The containers resist to numerous handling and rotations between sites.

## FOCUS

### FRANCE FIL'S STRENGTHS

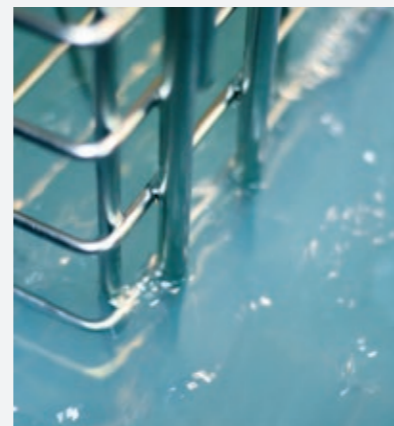

#### QUALITY

Automated and integrated production

#### STURDY AND ERGONOMIC

Reinforced structure  
Foldable

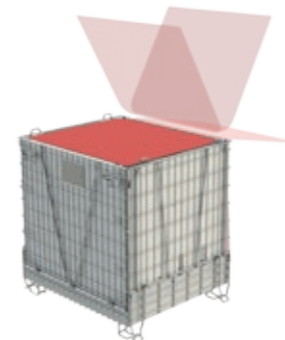

#### SUSTAINABLE AND SAFE

Best corrosion resistance  
Chemically neutral, hexavalent chromium free coating

## OPTIONS

Lid in Polypropylene on upper side

Optimised height for transport by truck (+7%)

Long feet

Additional Identification plates
