A strong partner for electronics cooling

Success is based on continuity

Robert Cap, the son of the founder looks back on the successful history of the company that his father founded: "For over 25 years we have been successfully marketing electronic components on the "cooler market". The success story of SEPA fans and CPU coolers began in 1990. It was continued by adding fans of other renowned manufacturers, an extensive range of accessories and numerous services.

„However, despite this positive development, we are focussing fully on the future“ remarked the founder Heinrich Cap. „A convincing reason for handing over the management of the company to my son, to ensure that we successfully meet both the challenges of today and tomorrow. “Since then we have been able to master a number of new tasks, e.g. the building of the new company headquarters in the industrial park Breisgau/Eschbach and the introduction of a quality management system (ISO 9001:2015).

To achieve this, we require a highly competent team! In the course of the years, an experienced team has established itself: Team spirit, a positive work environment, common goals and the customers constitute the fundamental basis for a low staff turnover.

The fascination of customized cooling solutions

Our portfolio – fresh air and fresh ideas

We aim at convincing our customers with our extensive product range. This not only includes axial and radial fans but also chip coolers and a wide range of accessories, e.g. finger guards, AC connection cables and dust-proof grids.

Our passion for fans is reflected in the development of special customized solutions ranging from ready-for connection, assembled fans with customer-specific lead lengths and connectors, picked goods in sales-oriented packaging to complete customer-specific fans. We offer tailor-made solutions to meet your exact requirements, e.g. fan/heat sink combinations with heat pipes or Peltier elements. We address new challenges and always find the appropriate solution.

High flexibility and the constant availability of all products are decisive aspects of our corporate philosophy. For this very reason, we moved 2015 to our new building in the Eschbach Industrial Park Breisgau with its considerably larger storage space. We are now in a position to immediately supply many standard fans and accessories.

Sales representatives in Germany, Austria, France and Switzerland as well as some Eastern European countries ensure personal on-site customer support.
